Project 1 : Create a simple calculator (add, substract, divide and multiply)
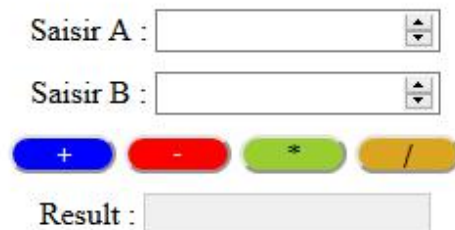

Scenario :

1 - User enters 2 numeric values in the input fields

2 - Chooses the operation (+, -, / or *)

3 - Get the result in the result field

Condition :

1- The 2 fields must be numeric inputs

2- You **can not modify** the result field

3- When user divides a number by zero, an alert will appear to the user.

4- The project must look like the exemple (feel free to choose the buttons colors)

5- The content should be centered.

Hints :

HTML : input type number, label, input disabled, label

CSS : background-color, color, border-radius, text-align, margin auto

JS : getElementById, parseInt, onclick
